

"I'm sorry that you got to me before I could get to you to report on the wonderful ramp and the "just right" positioning and set-up. Keith was an exemplary leader, very focused, with practiced skill in the unloading and placement of those substantial pieces. Sam worked smoothly with him, and both men were polite and professional every step of the way. This afternoon another senior sister went with me to see the progress on the house repairs. She pronounced the ramp "perfect" and "a God-send." When I told her who the "sender" was, she said you were the "God-send" then...I cannot argue with her analysis. Everything - the design, the strength, the placement and look of the ramp is sooo much more than we were dreaming of as we started planning for our repair project. I am relieved that our sisters and other users will have such a safe and good-looking access to the house. I cannot thank you and Kim enough for being so good to us (and to the house, too)."
